Oggetto: Re: Motore Thirtysix

Dear Claudia,

Unfortunately we were not able to fix the engine.

We tried hard till this late afternoon but it is a serious problem that can only be solve in-house.

We kindly ask the RC to extend the permission for the rest of the event.

My best regards,

Diogo Cayolla

TC & RC extends the authorization of day 22 so Thirky Six can participate for the rest of the event in same conditions.

Buongiorno Claudia,

Yesterday our engine didn't work. We contacted Torqueedo, and unfortunately they have no technician available that can help us.

Unfortunately it seems a problem not easy to solve. At least for this event.

Having said that, I would like to ask for permission to exceptionally being towed in and out of the marina.
