

Yellow Brick Trackers / Procedure

General Information

The St. Petersburg Yacht Club is vitally committed to the safety of each vessel in the Regata del Sol al Sol. To aid the Race Committee and the family and friends of those making the sail, SPYC is providing each vessel a rented satellite-based tracking device that will allow all to see each vessel's progress. These are the same trackers that have been used in prior years.

Once the race begins and trackers go active, the progress of each boat will be viewable 24/7 on the RegatadelSolalSol.org website, via the YB Races app for Apple or Google, or on the ybtracking.com website.

The race name to locate is "Regata del Sol al Sol 2024."

Procedure for Receiving the Tracker

Each skipper will receive the assigned device for his/her vessel at Check-in on April 25, 2024. The deadline for returning the tracker is **Thursday, May 9, 2024**.

During Check-in, a waiver must be completed and signed. Also, a credit card guarantee is required should the device be lost, damaged or not returned. The SPYC Race Committee will safeguard this credit card information and use it only if the assigned tracker is not returned or is returned damaged.

Procedure for Returning the Tracker

The deadline for returning the tracker is **Thursday, May 9, 2024**. These devices are rented and expected back in the UK for other events. Please assist the Race Committee by returning the device in a timely manner. Here are possible scenarios for the device return:

1. The Skipper wishes to use the device during the vessel's direct return to the Tampa Bay area:
 - a. Hand-deliver the assigned tracker to the St. Petersburg Yacht Club by Thursday, May 9, 2024.
 - b. Do not mail it back to Yellow Brick.
2. The vessel is not returning directly to the Tampa Bay area:
 - a. The Skipper must return the assigned tracker to the SPYC Race Committee in Isla Mujeres on or before **Thursday, May 2, 2024**.
 - b. A receipt will be provided as proof of the device return.
