

## The Wetherill Club Challenge Trophy

The Essex Yacht Club has created the Wetherill Club Challenge Trophy to promote increased participation in distance racing and friendly competition between yacht clubs.

The Trophy will be awarded to the club with the highest combined score of its three highest-scoring boats based on their places in their respective classes. Each boat's score shall be calculated as a decimal percentage of her High-point Score in Class divided by the Number of Starters in her class, where her High-point Score in Class is given by (Number of Starters in Class plus 1 minus low-point score in class) based on corrected time.

Scoring ties, if any, will be broken in favor of the club with the lowest combined corrected time of its three boats.

If an entrant lists more than one club on her entry form, for the Club Challenge Trophy she shall be scored as representing the first-named club on her entry form. If her first-named club has less than three entries she shall be scored as representing the second-named club on her entry form and so forth.
