

Chicago

Time (Local)	Wind Direction (MAGNETIC)	Most Likely Shift (1)	Shift Type (2)	10m TWS (Knots)	Potential Gust (3)		Sig Wave Height (ft)
9-Aug-24 08:00	275 - 305	▲	Oscillating	13 - 17	21		Sunny to start the day. Gusty and shifty offshore wind. Look for a high gust-to-lull ratio with many abrupt puffs/shifts moving downwind off the lake-front. Chance of clouds moving off the shore. Lighter under clouds but then gusting as clouds move east.

------------	-----	----	---	-----	----	---	------------------------------

Weather: Mainly sunny this morning. Again, some cloud may develop later this morning and afternoon over southern WI/northern IL and spread toward the lake. Not as widespread as yesterday and impact will be less. Still, if any cloud moves offshore, wind will get lighter and tend to meander more. Very small risk of an isolated shower.
