

LONG POINT RACE WEEK

NOTICE OF RACE

AMENDMENT No. 1

AUGUST 23-25, 2024

5. MEASUREMENT

Each boat shall submit a valid PHRF of Southern California rating certificate. Boats entering the ORR Class shall also submit a valid ORR certificate. Boats may not change their rating certificate after 1700 on August 9, except as a result of a rating protest or to correct an error by the RA **or, for an ORR certificate, to amend a boat's Measurement Inventory prior to 2359 on August 21.**

Rationale – This event requires USSER safety gear for Inshore racing as per NOR 2.1. Many of the boats electing to be scored in the ORR class have rating certificates which include in their Measurement Inventory the weight of safety gear (including life rafts), tools and spares appropriate for long offshore races. To maintain the validity of their ORR certificates those boats must race with that gear aboard even though this race requires less equipment. Or, an ORR entrant can work with US Sailing's rating office to amend their ORR certificate with a different or default Measurement Inventory. This NOR amendment extends the deadline to amend an ORR certificate by change of Measurement Inventory.
